

Integral Capillary Concrete Waterproofing Systems Project Reference

Lynn Onn Reservoir Dee Valley Water Wrexham, North Wales

Description:

Built in 1943 the reservoir will be demolished and replaced by a newly constructed reservoir. To extend its current service life whilst the new reservoir is being constructed Penetron products were chosen to repair active leaks and general crack repairs.

Products used: Peneplug, Penecrete Mortar

Surface preparation and application of Penetron products was completed by our appointed distributor and specialist concrete repair company "Betonbauen Ltd". See www.betonbauen.com

All active leaks were treated with Penetron Peneplug and general cracks filled with Penecrete Mortar.

Penetron Admix will be used in the construction of the new reservoir.
