

## Integral Capillary Concrete Waterproofing Systems

### Project Reference.

### **Future Growth Project \_ KAZAKHSTAN Designed in the UK for Chevron Oil**

#### **Description.**

This joint venture project under the design of Fluor UK at their Farnborough UK offices, requires the production of 300,000 cubic metres of concrete to upgrade the production facilities from the current 200/300,000 Barrels of oil per day to 1,000,000 barrels per day.

#### **Products Used.**

Penetron Admix is specified to be added to all concrete to provide totally watertight concrete and extend the service life of all concrete structures
