

Integral Capillary Concrete Waterproofing Systems

Project Reference

Residential Basement. Somerset UK.

Description.

Following the new NHBC guidelines for Waterproofing of basements and other below ground structures which calls for the provision of a watertight concrete, Penetron Admix was added to this newly build below ground RC basement floor slab and walls.

Products Used.

Penetron Admix. Penetron Admix was added to the normal ready mix concrete and after normal curing time provided a total watertight concrete with self-healing capabilities for future protection
